EMPLOYMENT HISTORY

Foresight Regulatory Strategies in North Andover, Massachusetts *October 2016 – Present*
Data Analyst
- Analyzed data provided by clinical trial subjects in order to find meaningful trends using Microsoft Excel, PowerPivot, PowerQuery, FileMaker, and SQL.
- Organized the data in order to append it to clinical trial reports and present it to clients in a clear and meaningful way.
- Adhered to the strict standards of the FDA when handling clinical data and designing software solutions.

Software Development
- Created a custom inventory management solution using FileMaker from scratch in order to monitor the movement and statuses of clinical materials into and out of Foresight Inventory and various clinical trial sites.
- Created a user interface using VBA to immediately generate clinical reports.
